# Career goals

Become a full-stack developer in the future

# **Education**

## INFORMATION TECHNOLOGY - SOFTWARE TECHNOLOGY 2021 - 2025

Ho Chi Minh City University of Education

Currently participate in research to create IOT software and hardware at school

## **Technical skills**

**Programming Languages**: C++, C#, JavaScript, TypeScript, HTML, CSS **Framworks and libraries**:

- · Angular, NodeJs, ReactJS
- Bootstrap
- ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework, Identity, LINQ, ADO.NET, SignalR
- Winform, WPF, MAUI

Database: MS SQL Server, MySQL, Firebase

Foreign language: Having ability to read english documents

Others:

- 00P
- SQL
- Arduino
- Dependency Injection
- · Embedded devices
- Git/Github/GitLab
- · Postman, Swagger, RESTful API,

## **Certificates**

2021 Basic word, powerpoint certificate

2024 30 days Postman Challenge

## **Activities**

RESEARCH 2024 - unknown

Ho Chi Minh City University of Education

Collab with the school's physics department to research and develop software and hardware to create IOT devices (for example, physics simulation devices,...) to enhance the physics learning process for students. middle school and high school students

3 months internship at Kyanon Digital

8-2024 - 11-2024

### **Kyanon Digital**

Participated in the development and deployment of real-world projects for clients, utilizing technologies such as PHP and drupal, received in-depth training on the software development process and actively contributed to project discussions and feedback sessions

**Project description**: Hotel management application has role division so that users can book rooms online or book rooms directly.

Member size: 1

Demo: https://www.youtube.com/watch?v=79xL04T3RMM

Source: https://github.com/dark-doraemon/HotelManagementWithASP.NET2

Technologies: C#.NET MVC 6.0, MS SQL Server, Entity Framework, Bootstrap, HTML, CSS, JS

Responsibilities:
• Project owner

· Code all app function

#### 11-2023 | E commercial website (Web app)

**Project description:** This project was created by realizing that there are still many people who sell manually, so this software was created to make sales and revenue management easier and this project has been improved because it was used Web API to separate client side and server side, making project development faster
